PROFESSIONAL SUMMARY

Backend Developer with practical experience in Django, DRF, and RESTful API development. Built real-world projects involving user authentication, business logic, PostgreSQL integration, and deployment. Passionate about writing clean, maintainable code and collaborating in team environments. Ready to take ownership of backend modules in production-level systems.

SKILLS & INTERESTS & LANGUAGE

Python, Django, Django REST Framework, PostgreSQL, MySQL, Git, GitHub, JWT Auth, RESTful API, Docker (basic), Telegram Bot (Aiogram), HTML/CSS, Postman

PROJECTS

E-commerce REST API — Django, DRF

A RESTful backend system for an online store with features including product listings, shopping cart, orders, user profiles, favorites, and messaging. Admin panel support, JWT authentication, media file handling, and discount logic included.

Euro Learn Centor – Django, DRF

A learning center management system backend with roles (admin, teacher, student), test results linked to a coin reward system, course and lesson management, and student ranking based on performance.
